## BRITE ALUME™

PRODUCT NUMBER 207

### RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability. When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

### PRODUCT DESCRIPTION:

Bright Alume is a fast acting combination cleaner and aluminum brightener. It chemically cleans and brightens in one step, quickly removing oxide, road film, and diesel smoke from aluminum trailer bodies and other aluminum components. Bright Alume is ideal for cleaning and brightening aluminum where contact with steel is inevitable. Special additives help prevent accelerated corrosion of steel hinges, rivets, and frames common with cheap competitor brighteners.

### INSTRUCTIONS:

For general aluminum brightening, dilute 1 part Bright Alume with 30 parts cool water (do not use hot water). Apply to surface at low pressure (to decrease airborne atomization) starting from the bottom and working upwards. Let chemical penetrate soils for 1-2 minutes. Rinse with fresh water. Repeat if necessary.

### CUSTOMER BENEFITS:

- Quickly removes oxide, road film and diesel smoke.
- Highly efficient.
- Highly foaming.
- Special inhibitors protect advanced corrosion of steel.
- May be used either hot or cold.
- Excellent wetting ability.
- Biodegradable.

**Attention:** Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.
