Industrial **PRESSURE WASHERS**

# Extend-A-Wand

Featuring a Unique Design for Telescoping Wands

- Extends up to 24 ft.
- Big Selection Based On Size and Length
- Pin-Lock Design Holds Wand In Place
- Fatigue-Free Gun

The Extend-a-Wand is the premier telescoping wand in the industry with its many unique features. For one, it's built tough, yet lightweight and ergonomically designed for hours of high-level cleaning without the hassle of a ladder or scaffolding. There are five models ranging from 6.5 to 24 feet and variations of each model for differences in PSI and hose size—all with the features unavailable with any other extension wand, such as:

■ **Wand Tip** with 45° angle puts the spray where you need it on the surface being cleaned; popular gutter cleaning attachment (optional) uses handy hand twist-on connector.

■ A **Flat Side** keeps the extension tube from twisting while maintaining the spray nozzle precisely in the right position so you're not having to constantly adjust the wand.

■ Large-diameter **Handle** reduces operator fatigue while the insulated grip keeps hands cool—no gloves required even with 210°F water.

■ Unique **Pin-Lock Design** makes extending and collapsing the wand as easy as pushing a button. Also it never slides out of place, moreover there are no screw-on mounts to strip out.

■ **Premium Trigger Gun** has been ergonomically designed for hours of fatigue-free cleaning.

■ **Extruded anodized Aluminum Tubing** is stronger than regular round tubing. The 24-ft. model bends only 4-inches at full extension making the wand easier to control.

## Extend-A-Wand Specifications

Part No.	Length	PSI	Hose Size	Part No.	Length	PSI	Hose Size
4-0113663	6.5 ft.	3000	1/4 in.*	4-0113664	6.5 ft.	4000	1/4 in.*
