Meet Landa's Top 3 Choices for Tackling Your Toughest Cleaning Jobs!

PHW: This portable, electric-powered pressure washer is our flagship series with its rugged belt-drive Landa pump, stainless steel coil wrap and broad selection of electrical configurations and options. This diesel-heated series has cleaning power of up to 4.8 GPM and 3000 PSI.

MHC: No other medium-duty gasoline-powered hot water pressure washer does so much. Powered by a Honda or Subaru gas engine, the MHC has a technologically advanced engine-and-regulator combination so it needs no battery or 120V connection.

SEA: This top-of-the-line cold water pressure washer features a stainless steel cabinet and a long-lasting, belt-drive Landa pump that is capable of accepting water up to 175°F.

Electrical configurations available for 120V, 208V, 230V, 460V and 575V.

High-Pressure Cleaning Solutions for INSTITUTIONS

Nothing cleans faster, better and easier than a Landa pressure washer. Surprisingly, pressure washers also conserve water, using only a fraction of the water that is typically used when cleaning with a garden hose. Selecting a power washer is like painting—the bigger the brush, the faster you get the job done. Pressure (PSI) determines the width of the spray. High water volume (GPM) cleans more effectively. Both high PSI and GPM deliver an ideal knock out punch.

WHY hot water cleans faster and better

It's a fact as obvious and elementary as washing dishes in the kitchen sink: **hot water cleans faster and better than cold.**

How? Higher temperatures cause water molecules to collide with each other creating energy that in turn causes grease and grime to break free from the surface to which they are attached.

Hot water power washing, with water temperatures up to 200°F, also produces a

sanitizing advantage especially important to the medical and food industries.

Over the years, it has been determined that heat isn't the only element of cleaning that can impact effectiveness. Agitation (water volume and pressure) and soap are also crucial.

Hot water pressure washers bring together a perfect balance of water agitation (GPM and PSI), heat-friendly detergents and heated water to create the ideal cleaning machine.

WHERE to get support

Landa's high-pressure cleaning equipment is backed by a network of more than 200 authorized sales and service centers, trained to provide complete needs analysis, operator instruction and service support

LANDA®
